

S760 LIQUID DEFOAMER

LABEL INSTRUCTIONS

Product Description & Directions for Use:

A concentrated defoaming agent for the control of foam in hot water extraction machines. Liquid Defoamer is designed to prevent oversudsing caused by shampoo, soap and spotting agent residues and can be used in all types of extraction cleaning equipment.

For professional and industrial use only.

Shake well before use.

Add 20ml. of Liquid Defoamer concentrate per 10 litres of recovery tank capacity (1 to 500).

Mix the required amount of concentrate in a small amount of water and feed this solution into the vacuum hose, with the vacuum motor switched on.

For upright extraction machines with no vacuum hose, add pre-diluted Liquid Defoamer directly to the waste recovery tank. Repeat above methods of defoaming after every emptying of the waste recovery tank.

Do not add Defoamer to the cleaning solution.

Do not apply Defoamer directly to the carpet.

For excessive foam, increase the amount of Liquid Defoamer required.

- Professional anti-foam concentrate for carpet hot water extraction machines.
- Contains high concentrate of powerful silicone emulsion which counteracts foam from previous shampoo residues.
- White liquid with mild odour.

pH Concentrate: 8.0

pH Diluted: 8.0

Keep out of the reach of children.

Do not get in eyes, on skin, or on clothing.

Wear protective gloves.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical advice / attention.

Safety data sheet available on request.

Please consult the Safety Data Sheet before using this product.

This product is intended for professional use only. The information given is intended to be of assistance to users but is without guarantee. Variations can occur in application and users are advised to conduct their own tests. Suggestions for use neither give nor imply any guarantee as to the intended use.
