

Product description

Odour Stopper utilises specialist enzymes to break down organic odours at source and remove stains.

Core benefits

- Sustainable and environmentally friendly solution which delivers quick and effective odour elimination
- Breaks down odours at source rather than just masking the smell
- Tailored enzymatic action increases the speed of odour removal
- Specific enzymes effective against organic based odours from:
 - human and pet accidents (vomit, faeces, sweat, urine and wet dog odours)
 - food based spills (milk, wine, egg, sauces, red wine, fruit juices)
- Dual action; cleans and deodorises
- Ideal for industrial, institutional and commercial use
- Suitable for use on most colour fast surfaces

How does it work?

Odours from food and organic waste invariably penetrate porous surfaces, becoming deeply embedded in fabrics, carpets, seats and flooring.

Traditional air fresheners and cleaners provide temporary relief, but fail to address the cause of the problem, enabling bad odours to return. Odour Stopper's enzymes quickly and easily penetrate porous surfaces and fabrics, breaking down hidden organic based deposits at source, ensuring optimal and sustained odour control.

ODOUR STOPPER

Directions for use

Odour Stopper is supplied in ready to use format and should be sprayed liberally over the affected area. No need to rinse surfaces following application

Product specification

Contains: Fresh fragrance, cleaning agents and enzymes

Pack Sizes

750 ml
