

# Bryta Dishwashing Powder

## Machine Dishwasher Powder for Manual Dosing

### Description

Machine Dishwasher Powder is a alkaline detergent powder for use in all types of domestic and commercial manually dosed dishwashing machines.

### Key properties

- Formulated for the professional caterer to cut through grease and dried on food.
- Formulated with bleaching agent.
- Contains phosphates.

### Benefits

- Minimises re-washing
- Removes tannin stains
- Helps prevent scaling and suspends soil to prevent re-deposition

### Use instructions

Remove food scraps before putting dishes into the machine. If the dishes are not to be washed immediately, use the Rinse and Hold programme to prevent scraps drying onto dishes. Load the dishwasher following the manufacturer's instructions. Correct loading is essential because this allows water and detergent to make effective contact with all the surface to be washed. Do not mix different metals (e.g. do not put stainless steel and silver cutlery in the same rack).

Stack glassware carefully - never tightly. Use the mildest wash programme and the correct dosage of Bryta Dishwasher Powder. If your dishwasher has no detergent dispenser pour Bryta Dishwasher Powder onto the inside of the door or onto the floor of the machine or as directed by the Dishwasher Manufacturer. Never sprinkle dishwasher powder directly onto crockery or cutlery. After use, reseal inner bag and close top of carton.

NB. DELICATE ITEMS. Some items of tableware are not suitable for automatic dishwashing (e.g. hand painted and some "on-glaze" chinas). If in doubt test-wash a single piece from the set 8-10 times.

Machine Water Capacity	Soft Water	Medium Water	Hard Water
<20 L	15 ml	30 ml	45 ml
20-40 L	30 ml	60 ml	90 ml
40-60 L	40 ml	80 ml	120 ml

For small industrial machines which retain the wash solution, or if results begin to deteriorate, top up after 10-20 minutes operation with half the above amounts.

### Technical data

Appearance: White free flowing powder, un-fragranced  
pH 1% Soln: 12.0

The above data is typical of normal production and should not be taken as a specification.
