

Clax Mild

Enzymatic liquid detergent for washing all type of fabrics

3RL1

Description

Clax Mild is a complete enzymatic liquid mainwash detergent specially formulated for use in commercial, hospital and on premise laundries. The product has been designed for automatic and manual dosing and can be applied in all water hardness conditions. **Clax Mild** is suitable for washing all cotton and polycotton fabrics.

Key properties

Clax Mild is a low alkaline, mild product, based on an effective blend of surfactants, water hardness sequestrants, anti-greying agents, enzymes and optical brightening agents.

The phosphate based building system ensures low water hardness ion concentration and consequently prevents precipitation of detergent components. Phosphates also function as anti-greying agent by keeping soil particles in suspension (prevents redeposition). In addition other ingredients with anti-redeposition properties have been included in the product.

Clax Mild has been formulated with a blend of anionic and nonionic surfactants ensuring good particulate and fatty/oily soil removal. The presence of proteolytic enzyme leads to protein degradation, thus facilitating removal of proteinaceous soil such as blood and food stains.

This product is mainly used as a single shot mainwash detergent. However, it may also be applied in conjunction with an alkali booster (for heavily soiled fabric).

Clax Mild is used for cleaning fabric from hospitals and other healthcare establishments, hotels and restaurants. In addition this product is suitable for washing delicate articles.

Benefits

- Excellent performance on a wide range of stains and types of soil
- Prevents greying of linen; stabilisation of soil particles in the wash liquor
- Very effective on proteinaceous soil (e.g. blood and food stains)
- Suitable for washing delicates and coloureds

Use instructions

Dosing level is dependent on wash classification.

Dosage recommendation:

Soil level	Dosage (ml/kg dry goods)
Light	8 - 12
Medium	12 - 15
Heavy	15 - 30

For best results:

- Use softened water
- Segregate polyester cotton articles from other articles and wash separately
- Separate white and coloured goods
- Sub-sort into light, medium and heavily soiled articles

Technical data

Appearance	white liquid
pH [neat]	7.4
Relative density [20°C]	1.21
Viscosity [mPa.s;25°C]	725

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Store in original closed containers or (where applicable) in an approved bulk tank, away from extremes of temperatures.

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.
